DETAILED ACTION

Election/Restrictions

1. Applicant's election of Group I in the reply filed on July 12, 2005 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 4 and 5 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Takemae et al (5122919) as presented in the last office action, mailed October 6, 2005.

Takemae et al discloses a nonwoven sheet having fused joints 4 and projections 1, 2 on both sides thereof. The projections 1 on the first side are larger than the projections 2 on the second side. Refer to figure 1.

4. Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by JP2002-187228 as presented in the last office action, mailed October 6, 2005.

JP 2002-187228 discloses a nonwoven sheet having fused joints 3 and projections 1, 2 on both sides thereof. The projections 1 on the first side are larger than the projections 2 on the second side (see figure 2). The second, or lower, sheet

comprises crimped fibers. Refer paragraphs [0032]-[0042] in the English translation included by the examiner.

5. Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by EP 1209271 as presented in the last office action, mailed October 6, 2005.

EP 1209271 discloses a nonwoven sheet having fused joints 3 and projections 1, 2 on both sides thereof. The projections 1 on the first side are larger than the projections 2 on the second side (see figure 2). The second, or lower, sheet comprises crimped fibers. Refer to paragraphs [0032]-[0039], [0041]-[0049] and [0066] and figure 2.

Response to Arguments

6. In response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., the protrusions formed on the lower side having portions 5 projecting in a planar direction of the nonwoven fabric over at least a portion of the adjacent heat fusion joint or a laterally protruding portion 5) are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within

Art Unit: 1772

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
